Report ALGAE Blooms to Dept. Environmental Protection, Bureau of Labs (850) 245-8159 or Dept. of Health, Aquatic Toxins Program (850) 245-4250 (850) 245-4250

Radio Stations with Emergency Information

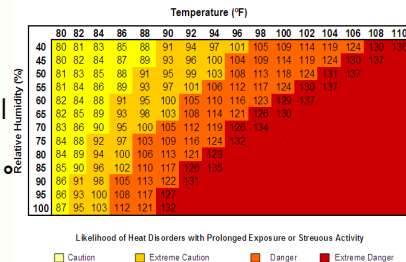

Homeland Security Emergency Radio Station
 Palm Beach International Airport 1630 AM

NOAA Weather Radio KEC50 162.475 MHz
 Coverage North Broward, Palm Beach and Martin County

Watch for Heat Index and Air Quality Alerts

- Information about the heat index can be found at www.nws.noaa.gov/om/heat/heat-illness.shtml
- Get air quality reports from www.airnow.gov, or call 561 837-5092 to hear report.
- Heat Index over 103°, be cautious! Vulnerable populations are at risk with a the heat index of 91°
- Remain indoors in air-conditioned places during heat waves and poor air quality days.
- If outdoors, avoid strenuous activity, stay hydrated .
- If you shelter in place, stock 1 gallon of water, per person, per day, 3-day supply, plus food.

Be Safe During Storms and Floods

- Keep storm drains, canals and gutters clear of debris to prevent floods and water damage.
- Stay Informed. Create a plan with your family and an emergency kit prepared, before an emergency .
- Communicate with family, friends and neighbors about your emergency plan.
- If you shelter in place, stock 1 gallon of water per person, per day; a 4-5 day supply, plus food.
- STAY OUT** of floodwaters. 6" of moving water can sweep you off your feet. Water depth is difficult to gauge and hazards could be submerged.

Assume Standing Floodwater is Contaminated

- Floodwaters are often contaminated with fuel, chemicals, sewage and bacteria.
- Avoid ALL contact with floodwaters, and avoid inhaling evaporating fumes.
- Clean all hard surfaces with a solution of 1.5 cup bleach to 1 gallon of water.
- Wear rubber boots and gloves and a mask during cleanup.
- Do not expose open wounds to flood waters.

Heed the Boil Water Alert Guidelines

- Don't drink, make ice, prepare food or brush teeth with tap water. Use bottled water if possible.
- Don't wash dishes, glasses, or cutlery in tap water. Use boiled water.
- Don't wash hands, expose open wounds or bathe babies in tap water.
- Bringing water to a rolling boil for a minimum of 1 minute, or disinfect with 8 drops of unscented bleach per
- After a boil water alert is finished, run the water from all faucets for 5 minutes and change filters of water and ice systems.

Minimize Mold Growth

- Molds are allergens; some produce toxins or release volatile compounds from materials.
- Active mold is black, green or pink. Inactive mold is powdery and often white, but will reactivate with moisture.
- To prevent mold, dry things as quickly as possible.
- Throw out items that have been wet for more than 48 hours. Freezing deactivates mold.
- Homeowners can clean moldy areas less than 10 square feet with a solution of 1 cup bleach per 1 gallon of water. Wear gloves and a mask. Professionals should address larger mold areas and clean air-conditioning systems.

Limit Exposure to Mosquitos and Algae

- Eliminate mosquito-breeding areas. Drain items that collect water outdoors including flowerpots, birdbaths, buckets, drums, child pools, etc.
- Minimize mosquito bites. Wear long sleeves, long pants and socks outdoors, especial around dawn and dusk..
- Use insect repellent with DEET or oil of lemon eucalyptus. Limit DEET exposure in young children by washing it off before bed.
- Report algae blooms to Florida DEP, Bureau of Labs (850) 245-8159. Algae can be toxic and must be tested.
